

Profile - Damian Harvey

Executive Summary:

Damian has extensive IT Consulting and Development experience gained through 12 years of consulting to major corporations throughout Europe, Asia and Australasia.

His experience covers a wide range of technologies and roles, allowing him to work comfortably at a high level and down in the detail.

Role:

At Locus Software Ltd, Damian is the Chief Architect and Lead Developer. He is in charge of all development effort and maintains oversight of the code base for Locus and our customers. On a day to day basis Damian is often developing new functionality and leading a team of developers working to implement new solutions.

IT Experience:

Damian has extensive IT Consultancy experience with major corporates such as Vodafone, Bayer, Air New Zealand, Fonterra and TNT Logistics. His technology skills cover vendors such as Jboss, IBM, and Sun Microsystems.

His areas of speciality are:

- Application Development
- Web Development and Design
- Solution Design and Architecture
- Infrastructure Design and Architecture
- Enterprise Application Integration
- Business to Business communication (B2B / EDI)
- Agile and Rapid Development methods
- Open Source technologies

Most Recent Projects:

- Developed Locus Odyssey, a solution for the Shipping Industry allowing efficient interaction with the Bookings process for the Liner Trade. Based on Java EJB3 and JBoss Seam.
- Implemented an EAI / EDI solution for TNT Logistics providing high volume transformation of critical business messages between geographically dispersed business partners based on IBM WebSphere technologies.
- Architected numerous projects as part of the Air New Zealand IT Architecture team including designing IBM WebSphere Message Broker infrastructure and Solutions utilising it.

Technical Skill Set:
